

SPAW/SPW/SFCW Heavy-Duty Bearing Units

INDUSTRIAL SOLUTIONS™

9400 W. 55th Street • Merriam, KS 66203
Phone: 913.677.3151 • www.ibtinc.com

CAT. No. C-2600-V

Heavy loads and contamination require heavy duty protection.

The Better Option

Less downtime.
More profitability.

NTN SPAW/SPW Heavy Duty Spherical Roller Bearing Units have been designed and tested to provide superior performance in applications with heavy contamination concerns. These are easy-to-install SAF/SN replacement units that are factory sealed, pre-lubricated, and assembled.

Product Features & Benefits

- 1 One-piece, sturdy ductile iron housing to withstand high shock and impact from falling debris
- 2 Repositionable snap ring allows for versatile fixed or float unit
- 3 Spring-loaded, single-lip contact bearing seal for superior sealing
- 4 Bearings with super-finished rollers for less noise, and raceway designs that accommodate higher misalignment
- 5 Unitized bearing insert allows for easy replacement
- 6 Phosphate-coated locknut/adaptor sleeve for secure mounting and corrosion protection

Heavy Duty Block Nomenclature System

1. PREFIX

- No symbol: Standard unit with sealed spherical roller bearing insert
- C: 2 open end covers (SFC housing with one cover only)
- CM: 1 open end cover, 1 closed end cover (SFC housing with end cover only)

2. HOUSING

- SP: Pillow block unit to SN housing dimensions
- SPA: Pillow block unit to SAF housing dimensions (SP and SPA only) Ductile iron
- FSPA: Pillow block unit to SAF housing dimensions Ductile iron, 4 bolt
- SFC: 4 bolt piloted circular flange block for two or four bolt arrangement

3. BEARING

- W22xx: MX-W222xx series sealed spherical roller bearing

4. BORE DIAMETER (-Xnn)

- No value: Metric bore sizing (see tables)
- X: Number of inches
- nn: Number of 1/16 inches
eg.: -307 indicates a 3 7/16" bore

5. SUFFIX

- N1: Ductile iron housing (Standard)
- FN1: (SP and SPA only) Ductile iron housing with solid base and indents for two or four bolt arrangement

How To Order Your Ideal Bearing Unit

SPAW

Example: When you order one SPAW2220-307N1, you will receive an assembly consisting of one SPA220N1 Pillow Block Housing, one MX-W22220EALLKW33C3 Bearing, and one HA2320M1 Adapter.

When C-SPAW2220N1 or CM-SPAW2220N1 are specified, external covers will be supplied with the unit.

Example: "C" prefix – 2 open end covers

"CM" prefix – 1 open end cover, 1 closed end cover

SPW

Example: When you order one SPW2220N1, you will receive an assembly consisting of one SP220N1 Pillow Block Housing, one MX-W22220EALLKW33C3 Bearing, and one H2320XM1 Adapter.

To order a solid base housing, add suffix F to the part number (example: SPW2220FN1).

When C-SPW2220N1 or CM-SPW2220N1 are specified, external covers will be supplied with the unit.

Example: "C" prefix – 2 open end covers

"CM" prefix – 1 open end cover, 1 closed end cover

SFCW

Example: When you order one SFCW2220N1, you will receive an assembly consisting of one SFC220N1 Flange Block Housing, one MX-W22220EALLKW33C3 Bearing, and one H2320XM1 Adapter.

When C-SFCW2220N1 or CM-SFCW2220N1 are specified, external covers will be supplied with the unit.

Example: "C" prefix – 1 open end cover

"CM" prefix – 1 closed end cover

Notes:– Open end cover service seals for which dimensions are shown are standard. For dimensions and availability of non-standard taconite service seals, consult NTN Engineering.

- All units are supplied in float arrangement and may be converted to fixed by relocation of a snap ring.
- All bearing inserts are supplied pre-lubricated with multi-purpose industrial bearing grease.
- Solid base housings may be drilled for 2 or 4 bolt arrangement.

Grease fittings are provided with all units.

How to Order

Example: When you order one SPAW2220-307N1, you will receive an assembly consisting of one SPA220N1 Pillow Block Housing, one MX-W22220EALLKW33C3 Bearing, and one HA2320M1 Adapter.

When C-SPAW2220N1 or CM-SPAW2220N1 are specified, external covers will be supplied with the unit.

Example: "C" prefix – 2 open end covers

"CM" prefix – 1 open end cover, 1 closed end cover

Notes: – Open end cover service seals for which dimensions are shown are standard.

For dimensions and availability of non-standard taconite service seals, consult NTN Engineering.

– All units are supplied in float arrangement and may be converted to fixed by relocation of a snap ring.

– All bearing inserts are supplied pre-lubricated with multi-purpose industrial bearing grease.

Grease fittings are provided with all units.

An eye bolt is provided on housings SPA228N1 and SPA232N1.

How to Order

Example: When you order one SPW2220N1, you will receive an assembly consisting of one SP220N1 Pillow Block Housing, one MX-W22220EALLKW33C3 Bearing, and one H2320XM1 Adapter.

To order a solid base housing, add suffix F to the part number (example: SPW2220FN1).

When C-SPW2220N1 or CM-SPW2220N1 are specified, external covers will be supplied with the unit.

Example: "C" prefix – 2 open end covers

"CM" prefix – 1 open end cover, 1 closed end cover

Notes: – Open end cover service seals for which dimensions are shown are standard.

For dimensions and availability of non-standard taconite service seals, consult NTN Engineering.

– All units are supplied in float arrangement and may be converted to fixed by relocation of a snap ring.

– All bearing inserts are supplied pre-lubricated with multi-purpose industrial bearing grease.

– Solid base housings may be drilled for 2 or 4 bolt arrangement.

Grease fittings are provided with all units.

An eye bolt is provided on housings SP228N1 and SP232N1.

How to Order

Example: When you order one SFCW2220N1, you will receive an assembly consisting of one SFC220N1 Flange Block Housing, one MX-W2220EALLKW33C3 Bearing, and one H2320XM1 Adapter.

When C-SFCW2220N1 or CM-SFCW2220N1 are specified, external covers will be supplied with the unit.

Example: "C" prefix – 1 open end cover

"CM" prefix – 1 closed end cover

Notes: – Open end cover service seals for which dimensions are shown are standard.
 For dimensions and availability of non-standard taconite service seals, consult NTN Engineering.
 – All units are supplied in float arrangement and may be converted to fixed by relocation of a snap ring.
 – All bearing inserts are supplied pre-lubricated with multi-purpose industrial bearing grease.
 Grease fittings are provided with all units.

SPAW/SPW/SFCW Installation Instructions

The following is the recommended procedure for mounting the SPW, SPAW and SFCW 2200 series heavy duty bearing units.

1. Adjust the position of the sleeve so that the tapered part comes to about the center of the bearing. The sleeve should be positioned so that the nut is easily accessible (see Fig. 1).
2. The SPW/SPAW/SFCW bearing unit can be adapted to either the fixed or floating configuration. Units are supplied in the floating configuration unless otherwise specified upon ordering.

Figure 1

FIXED CONFIGURATION: Using appropriate size snap ring pliers, position the snap ring in the innermost groove of the housing.

FLOATING CONFIGURATION: Using appropriate size snap ring pliers, position the snap ring in the outermost groove of the housing.

Figure 2

3. Install the unit on the shaft by sliding the bearing onto the adapter sleeve. Adjust the entire assembly as needed until the final bearing location is achieved. For floating configuration, ensure the bearing is centered in the housing before performing final adjustments (as in Figure 2).

Use eye protection and follow appropriate safety practices at all times.

4. It is very important that positive contact is established between the shaft, adapter sleeve and the bearing. Tap the wide end of the adapter sleeve lightly over its entire circumference. A cylindrical sleeve may be placed against the inner ring of the bearing to ensure it remains centered for floating configuration (see Figure 3). Install the lock washer and hand tighten the locknut. Verify that positive contact is made by tapping the groove on the back side of the adapter sleeve. If the sleeve rotates, positive contact has not been established and step 4 will need to be repeated.

Figure 3

Relieving the weight of the shaft on the bearing will help achieve positive contact.

5. Tighten the locknut according to the following table. A hook spanner or a hammer and punch are commonly used.

GUIDELINES FOR MOUNTING*								
Shaft Diameter Range			Bearing Number	Axial Displacement		Recommended Locknut Rotation	Hydraulic Pressure	
over	incl.	Metric		min.	max.		min.	max.
	1 15/16	50mm	MX-W22211EALLKW33C3	0.018	0.024	90°	1700	2250
1 15/16	2		MX-W22211EALLKW33C3	0.018	0.024	130° **	1700	2250
2	2 3/8	60mm	MX-W22213EALLKW33C3	0.018	0.024	90°	1750	2350
2 3/8	2 1/2	65mm	MX-W22215EALLKW33C3	0.024	0.030	120°	1800	2250
2 1/2	3	75mm	MX-W22217EALLKW33C3	0.028	0.035	150°	2050	2700
3	3 1/2	90mm	MX-W22220EALLKW33C3	0.028	0.035	150°	2250	3000
3 1/2	4	100mm	MX-W22222EALLKW33C3	0.030	0.043	180°	2650	3700
4	4 1/4	110mm	MX-W22224EALLKW33C3	0.030	0.043	180°	2750	3850
4 1/4	4 1/2	115mm	MX-W22226EALLKW33C3	0.043	0.055	210°	3250	4500
4 1/2	5	125mm	MX-W22228EALLKW33C3	0.043	0.055	210°	3300	4550
5	5 1/2	140mm	MX-W22232EALLKW33C3	0.047	0.063	150° ***	3950	5250

* Values apply to solid shafts and normal loads after positive contact is achieved. For hollow shafts, heavy loads (Pr>0.12Cr), or other special circumstances, please consult NTN Engineering.

** Value reflects a decrease in adapter sleeve thread pitch (2 inch shaft only).

*** Value reflects an increase in adapter sleeve thread pitch.

6. Bend one of the tabs on the circumference of the lock washer into the nearest notch on the rim of the locknut. If no tabs line up, tighten the locknut slightly. The locknut should not be loosened in order to align the tab with a notch.
7. Reposition the housing and mount the unit securely to the machine.

Excessive misalignment can cause the bearing seals to become unseated. Seals can only be re-installed if unit has not been run for any length of time, if no contamination of the bearing has occurred, and if even pressure can be applied around the periphery of the seal to prevent bending.

Bearings come pre-lubricated with multi-purpose industrial bearing grease and require no lubrication upon initial installation.

For extremely contaminated environments, external covers are available.

REMOVAL INSTRUCTIONS

1. To remove the unit from the shaft, raise the bent lock washer tab, loosen the locknut two or three turns, then tap the nut over its entire circumference with a hammer and punch. Ensure sufficient threads remain engaged as to not damage them. Continue tapping until the adapter sleeve can be moved.
2. To remove the bearing insert from the housing, remove one of the snap rings and slide the bearing out.

Appropriate eye protection should be worn when handling snap rings.

Notes:

- All bearing inserts are supplied pre-lubricated with multi-purpose industrial bearing grease .
- Outer ring lubrication holes and oil groove provided as standard.
- Limiting speeds listed may not apply under conditions of greater than normal load and/or temperature.

*For outside diameter chamfer dimensions, please contact NTN Engineering.

SPAW/SPW/SFCW Engineering

Recommended Shaft Tolerances

SPAW/SPW/SFCW MX-W Relubrication Schedule			
MX-W Insert	Relubrication Interval Under Normal Environmental Conditions ¹ (hours)	Relubrication Interval Under Contaminated Environmental Conditions (hours)	Approximate Relubrication Grease Quantity ² (grams)
MX-W22211EALLKW33C3	2,100	1,050	10
MX-W22213EALLKW33C3	1,800	900	15
MX-W22215EALLKW33C3	1,500	750	18
MX-W22217EALLKW33C3	1,300	650	28
MX-W22220EALLKW33C3	1,100	550	50
MX-W22222EALLKW33C3	1,000	500	70
MX-W22224EALLKW33C3	900	450	85
MX-W22226EALLKW33C3	800	400	100
MX-W22228EALLKW33C3	700	350	130
MX-W22232EALLKW33C3	600	300	225

¹ Re-lubrication interval values were derived from NTN cat. 2202-XII/E, Fig.11.2. Values apply to the basic bearing part number independent of actual shaft size (eg. SPW2215-207) and with the following assumptions:

- Equivalent radial load is less than 9% of Cr
- Axial load is less than 30% of radial load
- Speed is 1 000 rpm

² Re-lubrication quantity values based on grease with specific gravity 0.9. Value represents 50% of initial factory fill value.

Notes: Actual operating conditions will change the re-lubrication interval and the above is only given as a general guide. Please consult NTN Engineering for further review. To avoid over-greasing, it is recommended that the unit is not lubricated while stationary.

Notes:

- The adapter number denotes the complete assembly consisting of adapter sleeve, locknut and lock washer.
- Suffix X denotes the narrow slot type of adapter sleeve.
- The straight inner tab type of lock washer (also denoted by X) should be used with this sleeve.
- Suffix Y denotes a non-standard thread.

SPAW/SPW/SFCW Accessories

Over 55% of premature bearing failures are lubrication related. The most common causes are missed lubrication intervals, applying the wrong type or amount of lubricant, applying lubricant at incorrect intervals based on recommendations, excessive pressure resulting in seal failure, and/or contamination ingress. All of these problems are preventable. NTN automatic lubricators provide a constant and controlled supply of quality grease, 24 hours a day, 7 days a week.

READY: Gas-powered

All-in-one gas-powered lubricator; no activator required.

SMART: Electro-chemical

Advanced gas-powered unit; not affected by temperature changes.

DRIVE: Electro-mechanical

Motorized unit; provides precise lubrication amount; 360 degree lights allow for instant status updates.

Avoid damaging your bearing units during installation by using an NTN spanner wrench for proper installation. Using a spanner wrench helps minimize the risk of damaging the shaft, nut or bearing during installation.

Spanner Wrenches		
Bore Size		Spanner Wrench Part Number
Inch	Metric	
1 15/16 - 2	50mm	TLS-HKSPANNER50-80
2 3/16 - 3	60-75mm	TLS-HKSPANNER80-120
3 7/16 - 5	90-125mm	TLS-HKSPANNER120-180
5 7/16 - 5 1/2	140mm	NOT AVAILABLE

Since 1918, NTN has been a trusted OE manufacturer of high-performing bearing products that increase companies' productivity and efficiency.

- NTN has been the world's broad-line bearing manufacturer for nearly 100 years.
- NTN has the largest bearing manufacturing footprint in the United States.
- NTN is the largest supplier of American-made products to the construction and mining industries.
- NTN is a major supplier to over two-thirds of the world's "Fortune 500" manufacturing companies.
- More cars worldwide ride on NTN bearings and drivetrains than any other manufacturer's product.

◀ NTN was the first bearing manufacturer to be awarded the prestigious Deming Prize for recognition of its quality products and systems.

Beyond Bearings

Training. Installation Support.
Trouble-shooting. And more.

When you choose NTN, your team is equipped with all the necessary tools and resources to get the job done right. From installation to problem-solving, we'll be there with the hands-on support you need to take on your toughest challenges. This includes extra services such as:

Technical Training Unit

On-site, mobile training unit offering specialized, hands-on instruction from NTN engineers

Product Training School

Three days of in-depth instruction from NTN engineers at NTN headquarters
(go.ntnamericas.com/trainingschool)

eKnowledge

WEB-BASED TRAINING PROGRAM

Six online product training modules covering different bearing types and nomenclature
(www.ntnamericas.com/eknowledge)

NTN Bearing Finder

Customizable search tool featuring exhaustive data sets, comprehensive part interchanges and interactive CAD drawings
(bearingfinder.ntnamericas.com)
