

DRIVEN BY POSSIBILITY™

19M POLY CHAIN® GT CARBON™

WELCOME TO THE BIG TIME

GETTING A LEG UP – 19 MM AT A TIME

Even an oil bath wasn't enough to keep a leg elevator drive running. Every 3 months, maintenance staff had to adjust for stretch by removing a link from the hefty 200-2 chain. Best-case scenario, the entire chain had to be replaced once each year.

That's tough on the budget! Enter a Gates field engineer and the new Poly Chain solution. Known for high strength, no lube, dramatically reduced weight, and low maintenance, the facility was eager to give it a try.

Poly Chain 19mm is twenty pounds per foot lighter, yet strong enough to do the job. Weighing in at a fraction, yet equal in performance, and superior in terms of life in adverse conditions.

EVERYTHING YOU TRUST WITH POLY CHAIN:

- High power density
- Lubrication free
- Maintenance free
- Stretch free
- Long belt and sprocket life
- Lightweight

ROLLER CHAIN	19M POLY CHAIN GT CARBON
200-2	19 mm 125 mm width
Weight: 21.7 lbs/ft	Weight: 1.1 lb/ft

DRIVEN BY POSSIBILITY™

GIANT ROLLER CHAIN

VS.

19M POLY CHAIN® GT® CARBON™

19mm POLY CHAIN 19mm PITCH 125mm WIDTH	200 2 ROLLER CHAIN
Length: 5605 mm	Length: 5600 mm
Weight: 1.1 lbs/ft (not a typo)	Weight: 20.7 lbs/ft
